

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please cancel claims 19-26 without prejudice as follows:

LISTING OF CLAIMS:

Claims 1-30. (Canceled)

31. (Previously Presented) A photographing apparatus comprising:

a first recording section for recording, on a first recording medium, mainly still pictures together with information relating to the still pictures thus recorded;

a second recording section capable of recording, on a same second recording medium, both moving pictures and also pictures to be reproduced as still pictures; and

a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the still picture and information relating thereto are recorded on the first recording medium, a mode in which the moving picture is recorded on the second recording medium, and a mode in which the picture to be reproduced as the still picture is recorded on the second recording medium, said reproducing modes including a mode in which information relating to the still picture recorded on the first recording medium is displayed, a mode in which the moving picture recorded on the second recording medium is reproduced, a mode in which the picture recorded on the second recording medium so as to be reproduced as the still picture is reproduced, and a

mode in which the still picture is reproduced out of the moving picture which is recorded on the second recording medium to be reproduced as the moving picture.

32. (Previously Presented) A photographing apparatus as claimed in claim 31,

wherein the information recorded on the first recording medium is information used when the still picture recorded on the first recording medium is printed.

33. (Previously Presented) A photographing apparatus as claimed in claim 31,

wherein, in any of the modes in which the moving picture is recorded, an aspect ratio of the picture can be varied.

34. (Previously Presented) A photographing apparatus as claimed in claim 31, further comprising:

a display for displaying the still picture, the moving picture, or information in any of the reproducing modes.

35. (Previously Presented) A photographing apparatus comprising:

a first recording section for recording, on a first recording medium, mainly still pictures together with information relating to the still pictures thus recorded;

a second recording section capable of recording, on a same second recording medium, both moving pictures and still pictures; and

a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the still picture and information relating thereto are recorded on the first recording medium, a mode in which the moving picture is recorded on the second recording medium, and a mode in which the still picture is recorded on the second recording medium, said reproducing modes including a mode in which information relating to the still picture recorded on the first recording medium is displayed, a mode in which the moving picture recorded on the second recording medium is reproduced, a mode in which the still picture recorded on the second recording medium is reproduced, and a mode in which the still picture is reproduced out of the moving picture which is recorded on the second recording medium to be reproduced as the moving picture.

36. (Previously Presented) A photographing apparatus as claimed in claim 35,

wherein the information recorded on the first recording medium is information used when the still picture recorded on the first recording medium is printed.

37. (Previously Presented) A photographing apparatus as claimed in claim 35,

wherein, in any of the modes in which the moving picture is recorded, an aspect ratio of the picture can be varied.

38. (Previously Presented) A photographing apparatus as claimed in claim 35, further comprising:

a display for displaying the still picture, the moving picture, or information in any of the reproducing modes.

39. (Previously Presented) A photographic apparatus comprising:

a recording section capable of recording, on a same recording medium, both moving pictures and also pictures to be reproduced as still pictures;

a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the moving picture is recorded on the recording medium and a mode in which the picture to be reproduced as the still picture is recorded on the recording medium, said reproducing modes include a mode in which the moving picture recorded on the recording medium is reproduced, a mode in which the picture recorded on the recording medium so as to be reproduced as the still picture is reproduced, and a mode in which the still picture is reproduced out of the moving picture which is recorded on the recording medium to be reproduced as the moving picture; and

an aspect ratio selector for varying, in any of the modes in which the moving picture is recorded, an aspect ratio of the picture.

40. (Previously Presented) A photographing apparatus as claimed in claim 39, further comprising:

a display for displaying the still picture or the moving picture in any of the reproducing modes.

41. (Previously Presented) A photographic apparatus comprising:

a recording section capable of recording, on a same recording medium, both moving pictures and still pictures;

a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the moving picture is recorded on the recording medium and a mode in which the still picture is recorded on the recording medium, said reproducing modes include a mode in which the moving picture recorded on the recording medium is reproduced, a mode in which the still picture recorded on the recording medium is reproduced, and a mode in which the still picture is reproduced out of the moving picture which is recorded on the recording medium to be reproduced as the moving picture; and

an aspect ratio selector for varying, in any of the modes in which the moving picture is recorded, an aspect ratio of the picture.

42. (Previously Presented) A photographing apparatus as claimed in claim 41, further comprising:

a display for displaying the still picture or the moving picture in any of the reproducing modes.
